

Medical Collection Services

Whether you have a large medical practice or are a single practitioner, cash flow is negatively affected by slow-paying patients and unresolved insurance claims. The power of GreenFlag's third party intervention gets medical offices' bottom line back on track quickly. Plus, we understand the special needs of medical and dental practices and our services are designed to keep patient relationships intact.

Transworld Systems is also the only profit recovery company designated as a Medical Group Management Association (MGMA) AdminiServe Partner, providing a special discount to MGMA members. To date, our GreenFlag system has recovered more than \$230 million for MGMA members.

Transworld Systems is the only profit recovery company, at this time, with the Peer Reviewed by the HFMA designation.

Unresolved Claims

Practices receive swifter, more accurate resolution on insurance claims because GreenFlag re-prioritizes accounts and moves them from the clerk's desk into the hands of a supervisor.

Slow Self-Paying Patients

The GreenFlag System effectively collects on past due statements while ensuring that patients feel comfortable returning for medical care after responding due to our diplomatic third party intervention.
